🧠 SKILLS

- Systems Infrastructure Design
- Network troubleshooting
- Incident management
- Cloud infrastructure management
- Infrastructure automation
- IT security protocols
- AWS / GCP Cloud Architect
- DevOps / GitOps / CI-CD
- Kubernetes Architecture
- Cloud Native Design
- DevOps Automation
- Container Security

Darrell Burgher,
darrell@infrabyte.com

👤 PROFILE

Infrastructure professional with extensive experience in managing and upgrading IT infrastructure. Recognized for ability to enhance system performance and ensure operational reliability. Known for excellent teamwork, adaptability, and problem-solving skills in dynamic environments. My strengths are in technical research, systems and network management and architecture. I enjoy working as a Linux Systems Engineer. I am a Veteran Systems Engineer (22+ years) turned Cloud-Native Architect. Specializing in Kubernetes since 2017, I bridge the gap between legacy infrastructure and modern Platform Engineering. Expert in building Internal Developer Platforms (IDP) that prioritize developer experience without compromising on 99.99% production stability.

📁 PROFESSIONAL EXPERIENCE

Livescore
